

Made Visible Foundation

Patient MADE VISIBLE

The following are some suggested questions to accompany the Patient Made Visible video series. These are provided simply as starting points for discussion and reflection.

- 1 Do you recognize aspects of yourself/your institution in the story?
- 2 Is there a character in the story who you wish to know more about? In what way? Why?
- 3 How would you/your team handle different parts of the situation presented? The many aspects of the patient/family interaction? Same/differently?
- 4 What did you find most powerful about the story? Why? How might this impact practice in general? Your practice?
- 5 As you view these video portraits either alone or in a group setting, it can also be helpful to locate yourself and your institution in the story: Is there someone you particularly identify with?
- 6 As a healthcare provider, what reaction(s) do you have to the story? Do you regularly have opportunities to listen/hear the patient's perspective on their situation?
- 7 How would your institution respond to this story - roadblocks/helps along the way?
